Hello Michael,

Here are a number of decision documents for Cummins, Inc.'s on-highway HD diesel engines. A few are still waiting for CARB OBD approval, and the ISX12 still needs a bit of information, but I thought I'd send them all at the same time since they are all very similar in terms of emission control technology and control systems (AECDs), which hopefully will make your review easier.

Please let me know if you have any questions.

Sincerely,

Jay Smith
